
TRADE-IN POLICY

Due to the continuous changes in the field of science and computers, it is possible to trade-in from an older device to a newer device. Here is a guideline to follow, if you wish to trade-in your device.

1. Contact your local Sales Representatives and inform them about your interest. They can tell you more about their policies and assistance in trade-in procedure.
2. Check the current trade-in prices with your local Sales Representative.
3. After the funds have been received, we are able to send your trade-in device to you.
4. A trade-in must be completed online by Sales Representatives. Please contact your Sales Representative to begin this process or visit the webshop.
5. Your older device must be returned (we accept a trackable shipping number as confirmation) to the Budapest Home Office **after** your new device has arrived. Until that time, credit activation will be set on your device.
